

Sunday, December 3, 2017 • Renton Technical College • 12-4PM • 4 CE Credits

Jerry Demuth, DVM, DACVIM

**Understanding Neurological Pain:
A Literal Pain in the Neck**

In this lecture, we will explore pain and the neurological system. The plan is to briefly touch on the boring stuff (e.g., neuropathology) and then move on to the good stuff (the various presentations of neurological pain, and those diseases that mimic neurogenic pain). Videos and clinical cases will be provided as time allows.

Gregg Bennett, DVM

Rehabilitation Therapy and Pain 'Control in General Practice: Techniques for Improving Patient Comfort

Physical Medicine (Rehabilitation Therapy) is the application of external forces, including heat, cold, pressure, light, sound, electrical current, and exercise, to effect change in tissue. Many techniques available to the general practitioner are effective tools for improving patient comfort. This talk will focus on things you can do to improve both short and long-term comfort in your patients.

Kent Vince, DVM, MSpVM, DACVS-SA

**My Approach to Chronic Arthritic
Pain Management in the Dog and Cat**

A review of the current literature and treatment modalities for chronic arthritic pain management in the dog and cat.

Luminita Sarbu, DVM, PhD, DACVIM (Oncology)

**Management of Pain and Quality
of Life in Pets With Cancer**

Cancer care in pets should not be only about survival; it should be about enjoying life while living with cancer. This presentation will discuss various treatments to control pain and improve quality of life of pets with cancer.
