

Sunday, May 5, 2019 • Renton Technical College • 12-4PM • 4 CE Credits

Sherri Wilson, DVM, DACVIM (SA)

Using the FreeStyle Libre to Monitor Glucose Levels in Dogs and Cats

The FreeStyle Libre is a continuous glucose monitoring system (CGMS) developed for human diabetics. Once attached, it generates 14 days of glucose readings...while the patient is at home. The owner doesn't need to learn to collect BG samples, they just periodically scan a Reader over the Sensor that is attached to their pet. In this session we will learn how to attach it securely, how to get the data from it and some tips to know about interpreting the data.

Monitoring Trilostane Without Using ACTH

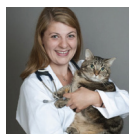

Cortrosyn is in short supply and is also expensive. In this session, we will review the studies that support the monitoring of Trilostane without using the ACTH stimulation test: when that is appropriate and when it is not.

Sandy Willis, DVM, DACVIM (SA)

Demystifying Diagnostic Testing: Pearls of Wisdom from Phoenix Lab

A little internal medicine, a little clinical pathology. This talk will discuss some commonly asked questions on diagnostics including sample submission, selection of tests for such processes as endocrine and infectious disease, and test interpretation. Feel free to provide your own questions.

Lisa Hann, DVM, DACVIM (SA)

An Internists Perspective of Nasal Disease

A discussion of the most common diagnoses and best practices for diagnostics and treatment of nasal disease.
